

00:19:03 Jennifer Rall (NC): I can see the full screen
00:19:41 Stuart Baker: Hi Stuart
00:20:10 Stuart Baker: From Treeconomics, looking forward to my first I-Tree webinar.
00:20:20 Naomi Zurcher: H everyone from Luzern Switzerland
00:21:16 Robert Wood: Hello from Santa Fe New Mexico
00:21:39 Susan Cox (She, her): Hello from New Hampshire
00:23:32 Paul Johnson: Hi from Austin, Texas
00:25:17 Chuck Nicholson: David, your screen sharing is not working - just message saying you've started sharing
00:25:36 DPowers: please change to presentation mode, so the slides are legible
00:25:38 Robert Wood: It is working for me.
00:25:43 Kate Robb: yes
00:26:22 Elisa Margarita: emargar@schools.nyc.gov
00:26:28 Karen Kuers: kkuers@sewanee.edu
00:26:30 Robert Wood: rwood@santafenm.gov
00:26:32 Dale Muttermutter: Hey Paul and you all, Alabama online until 12:30.
00:26:33 AmyB: aberkov@ccny.cuny.edu educational materials!
00:26:36 Mervin Pérez: ixmulej@gmail.com
00:26:44 Naomi Zurcher: Interested in all materials - treerap@sprintmail.com
00:26:59 Marysol Jaime-Arteaga: marysol.jaime@fs-ip.us
00:27:04 Jennifer Rall (NC): Please send MyTree in the Classroom materials to Jennifer.rall@ncagr.gov
00:27:22 Elisa Margarita: I am interested in all materials: emargar@schools.nyc.gov
00:28:40 Dale Muttermutter: Please send MyTree in the Classroom materials to dale.dickens@forestry.alabama.gov , thanks!
00:30:15 staciebender: Please send MyTree in the Classroom materials to Stacie.bender@usda.gov, thank you!!
00:30:24 evelien.droge: i would like to get it also evelien.droge@cobra-groeninzicht.nl
00:30:44 evelien.droge: Hi from the Netherlands!
00:31:27 Momath DIANKHA: Greetings from Senegal (West Africa)
00:32:19 Mervin Pérez: Hi everyone, greetings from Guatemala
00:37:28 David Bloniarz: Hi, Everyone... Thank you so much for joining!
00:38:20 Susan Cox (She, her): FYI, Woodsy turns 50 on September 15. <http://www.naturalinquirer.org/Woodsy-Owl-Resources-v-341.html>
00:38:27 David Bloniarz: MyTree: <https://dev-mytree.itreetools.org>
MyTree Map <https://dev-projects.itreetools.org>
Next week:
<https://mytree.itreetools.org> (MyTree)
<https://trilliontrees.itreetools.org> (map)
00:38:59 David Bloniarz: Questions/comments:
Mike Binkley
Mike.Binkley@davey.com

00:40:33 Naomi Zurcher: Do you go to trillion tree only for a new planting or for any tree that you are assessing?

00:41:41 Chris McBride SBECO Rotary: Is it iPhone compatible with iPhones? The app is not letting me register my device.

00:41:51 David Bloniarz: New Plantings for the Trillion Tree campaign

00:42:02 Aimee Esposito: For tree species, will there be custom options. A lot of our trees in the Southwestern United States is not generic inventory programs

00:42:08 Aimee Esposito: Same with fruit trees

00:42:20 AmyB: What is the URL for condition?

00:43:14 Momath DIANKHA: Please can we get the record after? Thanks

00:43:46 Stefanie Hauck: Yes, could you send the slide deck afterwards? Thanks

00:43:54 Kevin Whalen [Davey Tree Expert Company]: <https://database.itreetools.org/>

00:43:56 Naomi Zurcher: Over 10,000 in the database

00:44:28 DPowers: For kid's use, alter terminology like "goo" or "ooze" instead of exudation

00:44:30 Naomi Zurcher: We are doing species, varieties, sub-species and hybrids but no cultivars

00:45:20 David Bloniarz: <https://database.itreetools.org/#/splash>

00:45:38 Aimee Esposito: Will we be sent the recording?

00:45:46 Naomi Zurcher: Does MyTree estimate tree height and crown width from the DBH and the species combined?

00:46:02 David Bloniarz: The recording will be posted online

00:46:10 Al Zelaya: Here is a link to the current master species list spreadsheet form used by most i-Tree tools: https://www.itreetools.org/documents/670/Eco_Species_List_21Apr2022.xlsx

00:46:11 Kevin Whalen [Davey Tree Expert Company]: Yes, it estimates tree height, crown height, crown width.

00:46:53 Drew Hart US Forest Service: Please send educational materials to brent.a.hart@usda.gov (Drew Hart)

00:47:18 Kevin Whalen [Davey Tree Expert Company]: Another great resource is the i-Tree Glossary web-app <https://glossary.itreetools.org/>

00:47:33 Naomi Zurcher: Thanks Kevin

00:47:54 Tara Costanzo, WY: Project Learning Tree has a worksheet in their Teaching with iTree workbook that has a graphic too if you're working with young kids to demonstrate condition <https://www.plt.org/curriculum/teaching-with-itree/>

00:48:09 Susan Cox (She, her): exudation would be a great vocabulary word:)

00:49:07 Kevin Whalen [Davey Tree Expert Company]: <https://mytree.itreetools.org/>

00:49:34 Aimee Esposito: What's the url that the recording from today will be posted on?

00:52:00 kimlandsbergen: Can someone verify (later maybe) that the dataset generated will be open / available? (Seems like the iNaturalist model is a good one to follow)

00:52:03 Jason Henning - i-Tree Team: Here's that publication,

https://www.itreetools.org/documents/650/Understanding_i-Tree.gtr_nrs200.pdf

00:52:05 Mike LaMana: Excellent! Thank you. ML.

00:52:16 David Bloniarz: David.nowak@usda.gov

00:53:19 Al Zelaya: Aimee, I would suggest visting unri.org to check for the recording of this webinar. Dave B. posts these a few days later.

00:53:33 David Bloniarz: I-Tree database. You can add trees not on the tree list here. <https://database.itreetools.org/#/splash>

00:54:23 David Bloniarz: The recording and other materials will be posted later today/tomorrow am. Replay, Download and Other Resources from today's presentation

www.unri.org/webcasts/

00:55:19 Scott Maco - Davey Institute: Mexico, Colombia, and Delhi India are also on the list for MyTree functionality.

00:55:53 Mervin Pérez: How could Guatemala join this effort?

00:56:46 Kevin Whalen [Davey Tree Expert Company]: We are in the process of switching from city name based locations (that we filter through google and do our best to match on) over to lat/lng points, but we have to create a map layer for each country.

00:57:25 Kevin Whalen [Davey Tree Expert Company]: more information on collaborating with i-Tree in general can be asked about at info@itreetools.org

00:57:34 David Bloniarz: To add Guatemala, you can email Scott Maco at scott.maco@davey.com

00:57:35 Aimee Esposito: Love that I a public data source!

01:01:10 Stuart Baker: Future vales is a really cool feature.

01:02:17 Elisa Margarita: Would this be similar to NYC street tree map?

01:03:03 AmyB: What if we have the genus, but are not sure about the species?

01:03:17 Stuart Baker: Would be ace to have a social dimension.. tree planted by Fed Flintstone

01:03:31 Stuart Baker: *Fred

01:03:43 Chris McBride SBECO Rotary: Are trees we enter part of the "Trillion Tree Program"??

01:03:49 F Foen: How does this process deal with several groups collecting data for the same park, and duplicate the tree data, given the accuracy of cellphone GPS?

01:03:51 Karen Kuers: Did I understand that in the future we may be able remeasure / update data that we enter for specific trees?

01:04:49 Jason Henning - i-Tree Team: You can select genus if you don't know the species.

01:05:45 Elisa Margarita: True

01:07:33 David Bloniarz: You need to check the box on the input page if you want to add to the Trillion Tree Campaign

01:07:36 AmyB: Thanks, Jason!

01:07:40 Kevin Whalen [Davey Tree Expert Company]: The New York "million trees" project referenced the i-Tree papers for how it calculates tree benefits. I am not familiar with a NYC street tree

tracker, but tracking trees on maps in general is common.

01:08:08 Nolan Rundquist: I've been updating my street tree inventory for the past 6 years – will there be a potential for bulk upload of data at some point? (Or would there even be any interest in existing data)?

01:09:46 Kevin Whalen [Davey Tree Expert Company]: With MyTree, you have publicly collected trees that will have benefit calculations matching what city's have inventoried in i-Tree Eco.

01:10:36 Kevin Whalen [Davey Tree Expert Company]: There are view sides to bulk uploads.

01:15:02 DPowers: Great presentation, need to leave for another meeting

01:15:23 F Foen: Thank you for answering my question on GPS accuracy! Also, want to echo the interest in bulk uploads, specifically annual, as we are keeping track of community planted trees with ArcGIS online.

Separately, I think this is a great tool for community engagement.

01:15:44 Glen Olson: The ability to choose different aerial photos could be quite beneficial to locate the individual tree. Dormant is more helpful than in full summer foliage canopy.

01:18:08 David Bloniarz: Remember, if you would like to receive educational resources, please add your email to the chat..

01:18:18 Kevin Whalen [Davey Tree Expert Company]: We have been seeing increased favoring of ArcGIS Online for tree tracking. There have been discussion about how we can help that side of the community integrate with i-Tree more easily.

01:18:45 David Bloniarz: Replay, Download and Other Resources from today's presentation

www.unri.org/webcasts/

01:19:17 AmyB: Thank you!

01:19:34 Stefanie Hauck: Yes, thank you!

01:19:45 Mervin Pérez: It was a pleasure to see you again David Nowak, greetings from Guatemala

01:19:59 Elisa Margarita: Thank you!

01:21:02 Chris McBride SBECO Rotary: I am Chris McBride and I am interested in educational content to share with youth in my community, thanks!

01:21:06 Stefanie Hauck: Yes, would love education materials, Regional Ohio Action for Resilience, Stefanie.hauck@gmail.com

01:21:11 Momath DIANKHA: Thank you all, thank Prof Nowak.

01:21:29 Naomi Zurcher: Looking forward to it coming to Switzerland Great idea. Many thanks

01:21:35 Chris McBride SBECO Rotary: Chris mcbrides contact info is tophermcb1@mac.com tel 646 234 9010

01:21:37 Karen Kuers: Look forward to trying it out next week....hopefully with my students!

01:21:48 F Foen: Thank you! fai@greeningofdetroit.com

01:22:02 Stuart Baker: THANK YOU

01:22:04 Scott Todd: thank you – Great job
