

i-Tree in the Marketplace

Utilizing Science for Profitability

www.itreetools.org

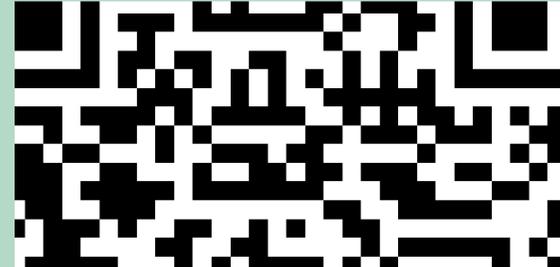

Canopy

Ideal for government contracts and reporting. Best at municipal level, but adaptable to a range of uses.

Design

Best for residential and commercial clients. Provides and value-added component to PHC and inventory/assessment analysis and reporting.

MyTree

Simple, easy to use mobile application geared toward individual properties and smaller commercial clients. A great sales tool to engage your clients.

Planting

Can be used for larger scale planting projects, primarily for commercial, government and institutional scale planting or consulting.

Landscape

Primarily geared toward consulting for local and regional planning. Landscape is a powerful tool that is well received by planners, opening new areas of client services.
